
Anglia Physio presents
Professor Peter O'Sullivan's 3 day
interactive clinical workshop on

**“Changing pain and
movement behaviour in
chronic low back pain
- using classification based
cognitive functional
therapy”**

Date: 22nd-24th April 2010

Venue: London - Venue to be confirmed

Course Tutor: Professor Peter O'Sullivan

Course Description: Professor Peter O'Sullivan from Curtin University, West Australia, has developed a novel classification and management system for chronic low back pain disorders. This system addresses both the mal-adaptive cognitive and physical behaviours associated with these complex disorders. Peter and his team of researchers have strong evidence for this approach. This 3 day interactive clinical workshop represents a rare opportunity to see Peter present the system and apply it to patients with chronic low back pain. Peter will also present ground breaking data from his teams recent research on the classification and management of spinal pain disorders.

Course fee = £330 (includes light refreshments, course workbook and CPD certificate)

Course Organiser: James Davis MCSP; MPA; MACP

Application form for this fantastic workshop please email :
